

Application Guide

- Step 1.** Prep and basecoat your part as you would any other paint job.
- Step 2.** Mix the Crystal Pearls into your choice of carriers.
- Step 3.** Spray the Crystal Pearls over the piece and let dry.
- Step 4.** Topcoat with a poly-urethane clear or your choice of topcoats.

Frequently Asked Questions

Q. Is Crystal Pearls just glitter?

A. Absolutely not, Crystal Pearls are a wide range of pearl sizes as well as metalized chips all ranging in particle size from 1 micron to 300 micron giving you amazing depth as well as sparkle. For unbelievable effect try going over Crystal Pearls with any of Alsa's Candy Concentrates.

Q. What can I put Crystal Pearls into?

A. Crystal Pearls can be used in an innercoat clear, color blended, or even as your final clear.

Q. What ratio should I mix at?

A. Due to the unique effects that can be achieved with either a light or heavy concentration there isn't a set ratio giving you plenty of room to experiment.
