CANDY CONCENTRATES **KCCC / KCKCCC**

ALSA CODE	GPI CODE	DESCRIPTION	SIZE
CC	KCCC	Candy Concentrates	4 oz / 8 oz
KC-CC	KCKCCC	Killercan: Candy Concentrates	400ml Aerosol

PRODUCT DESCRIPTION

Unlike typical Candy Concentrate, ALSA Candy Concentrate contain much higher levels of actual pigment rather than solvent, giving you nearly twice the coverage and a much more even distribution of colour. We have many Candy Concentrates with which any Candy Colour can be achieved.

MIXING RATIO

Depending on the desired effect and number of layers of clear intended to use, you can mix ALSA Candy Concentrates at the following ratio:

1 Quart of (Ready to Spray) Clearcoat takes 1 ounce of Candy Concentrate

- 8 ounces of Candy = 240 grams
- 35 drops of Candy = 1 gram
- 1 ounce of Candy = 30 grams

APPLICATION

1. Prepare and prime the surface as you would any normal paint job.
2. Apply your choice of basecoat colours or specialty paint (i.e. Killer Chrome (KCKCMC101); Base Pearls (KCABP); Stylin Basecoat (KCASB, KCKCASB).
3. Apply 2 - 3 wet coats to ensure uniform coverage.
4. Allow time to dry before applying your final clear or taping off graphics.
5. Topcoat with any of ALSA's recommended clears as you would with any other paint job (2K Speed Clear (KCSC1230, KCKCSC1230), 1K Lightning Clear (KCALC770, KCKCALC770) et cetera.

FREQUENTLY ASKED QUESTIONS

Q. How much do I need to add?

A. The unique thing about ALSA's Candy Concentrates is the fact that you need very little, unlike the recommended 20% ratio of other manufacturers. With ALSA's Candy you need just a few drops per pint or quart so very little will go a long way.

****NOTE:** This answer refers to the conventional range, Killer cans are premixed and not apply

Q. Will ALSA's Candy pool, streak, or bleed?

A. Due to the fact we designed these Candies to go over our chrome products they are extremely clear and crisp? Also, these Candies will not bleed through your graphics or into your final clear allowing you to maintain the integrity of your work.

Q. What types of solvents will ALSA Candy's work in?

A. ALSA's Candy will work equally well in virtually any solvent including but not limited to, lacquers, urethanes, enamels, and acrylics.

****NOTE:** This answer refers to the conventional range, Killer cans are premixed and not apply
