

The Alsa Corporation

The World's Most Exotic Finishes

TECHNICAL DATA SHEET

SUPER GLOW KCSG

ALSA CODE	GPI CODE	DESCRIPTION	SIZE
SG	KCSG	Super Glow	4 oz

PRODUCT DESCRIPTION

Unlike RetroGlow, Super Glow has no colour during the day, but glows a bright Blue or White colour in the dark. Super Glow needs just a fraction of the amount of charge time to produce a bright glow for hours.

APPLICATION

1. Prepare and basecoat the part with white basecoat. (Other colours will work just fine, however lighter shades will result in longer glow times.)
2. Mix Super Glow into an innercoat clear, colour blender, or even your final clear at a ratio of 4 - 6 ounces per pint. (Adding more Super Glow will result in a more intense glow effect.)
3. Topcoat with a polyurethane clear or your choice of topcoats.
