KILLERCHROME KCKCMC101

ALSA CODE	GPI CODE	DESCRIPTION	SIZE
KC-MC101	KCKCMC101	Killercan: Killer Chrome	400ml Aerosol
KC-MC101K	KCKCMC101K	Killercan: Killer Chrome Kit	400ml Aerosol

Kit Consists of: 1x KCKCMC101, 1x KCKCASB13, 1x KCKCALC770,
1x Lint-Free Polishing Cloth, 1x Instruction Guide

PRODUCT DESCRIPTION

Killer Chrome represents the latest in reflection coating technology with near microscopic particle content providing a superior surface orientation. This particle alignment is the key to Killer Chrome's shine.

****NOTE:** Do not be confused with the conventional range of MirraChrome, this product provides a similar effect.

APPLICATION

1. Apply the Killer Cans "Stylin Basecoat (Jet Black), GPI Code: KCKCASB13" over a prepared and primed surface.
2. Using the Killer Cans "Lightning Clear, GPI Code: KCKCALC770" you should now topcoat the black basecoat to provide you with a high gloss surface and insure the best results with Killer Chrome.
3. These parts should now be allowed to FULLY cure for 24 hours.
4. You are now ready to apply the Killer Chrome over the previously prepared piece. Begin by applying light "DUST" coats. **DO NOT SPRAY WET LIKE SPRAY PAINT!** This is a true metal deposition and requires a light, **EVEN**, application.
5. Continue to apply these "DUST" coats until you have achieved a uniform coverage and allow it to dry for a few minutes before proceeding.
6. You will now use the polishing cloth (included in the Killer Chrome Kit Only) by carefully washing with water to remove all of the excess "dust" from the surface. Once you complete this step you will notice a drastic improvement in the final appearance.
7. Be sure all moisture is removed prior to moving on to **STEP 8.**

APPLICATION - CONTINUED...

8. After waiting at least 15 minutes for all of the remaining solvents to fully evaporate you are ready to apply the protective topcoat "Lightning Clear, GPI Code: KCKCALC770".
9. Spray 1 - 2 coats evenly over the Killer Chrome to give it long lasting durability and an incredible amount of depth.
10. ****OPTIONAL**** - To achieve an automotive grade finish and durability you can next apply ALSA's unique (2K) clearcoat "Speed Clear, GPI Code: KCKCSC1230" (**Sold Separately**). Ensure "Lightning Clear, GPI Code: KCKCALC770" is fully cured then spray 1 - 2 coats evenly.
