| ALSA CODE | GPI CODE | DESCRIPTION | SIZE |
|------------------|-----------------|-------------------------------|----------------|
| ALC-770 | KCALC770 | ALSA 1K Lightning Clear | Quart |
| KCALC770 | KCKCALC770 | Killercan: 1K Lightning Clear | 400 ml Aerosol |

PRODUCT DESCRIPTION

ALSA developed a **NEW** revolutionary product that has now made MirraChrome much easier. There is no need to wait 7 days for the MirraChrome process, now the process can be completed in 1 - 2 days, no extra cost involved. The secret of this new revolutionary development is ALSA's Lightning Clear Coat. The product can also be baked at 140° F in order to achieve faster results.

APPLICATION

1. Allow your basecoat to fully dry. You are now ready to apply the Lightning Clear.
2. Apply 2 wet coats to ensure uniform coverage.
3. Let flash off before applying your final clear or taping off graphics.
4. For durability, you can topcoat with a polyurethane clearcoat as you would with any other paint job.
