PRODUCT DESCRIPTION

MultiChrome brings you the best of both worlds, a sprayable chrome panit combined with an intense prismatic color change effect. Simply dust this coating over a polished surface and watch it come to life.

MultiChrome can be applied with almost any type of spray equipment from airbrushes to full size HVLP guns. MultiChrome comes ready to spray meaning no reducers or hardeners, just pour it in your gun and spray, when you're finished simply pour it back into it's container to use later. MultiChrome can be used on any surface you can paint such as metals, plastics, wood, foams, et cetera. From trim pieces and logos to full blown custom paint jobs the possibilities are endless!

MultiChrome will create a mirror finish as long as your surface is as smooth as glass and a prismatic color burst when viewed from different angles.

APPLICATION - FOR CONVENTIONAL & AEROSOL

1. Apply ALSA Jet Black Stylin Basecoat
2. Allow to dry for 30 - 60 minutes before applying the recommended ALSA 2K Speed Clear

****NOTE:** Killercan is air dried based on weather conditions. Guide above can be used also.

3. Apply 2 Dust coats of MultiChrome at 25 PSI with an Iwata LPH50 (or equivalent gun) with a 1.0mm Fluid Tip, apply one coat after the other then allow the MultiChrome to sit overnight in a clean area at 77° F.

****NOTE:** Killercan does not need spray gun as feature is built-in.

4. Wipe and remove any excess dust / overspray with a soft lint-free cloth.
5. Clear with the recommended ALSA 2K Speed Clear
